Nepalese people feel that the most lover of Nepal is Japan. It is also true that one village of Nepal and one village of Japan is same.

Every year much of Japanese people are coming some of the tourism activities in Nepal. It is the safe and good destination for Japanese people. Not only Japanese people but for also other traveler in the world it is the good destination for all of those activities.

But I feel that a little bit Japanese people want to visit in their holidays.

We are in this field since 10 years involving operate tour and treks in Nepal.

My first visit is in 12 years ago, I got trek and tour around Kathmandu and Annapurna region. Since that time it is the resistance place of mine. I feel that it is really heaven in the mountain. I can not explain its characteristics and beauties with my word. So I want to say all of my Japanese friend to visit once time in their holidays. It is the better spot for holidays.
