# Positive motivation for Tourism Industry by revolution of Nepal, safe destination for Travelers

Posted by Peter - 2008/06/25 02:36

---

It's true that the Constituent Assembly will come once up on a century. The people of every county who can get the opportunity of voting for Constituent Assembly election, they got a big revolution and develop smoothly in every sector. It is also true that they got a many sacrifice to get CA election.

(Former King Gyanendra Shaha)

As like as other history of the world Nepalese people had also voted for Constituent Assembly Election. Many people were died and murdered for this type of CA election it was the war by dictator administration and democratic people. At last the people of democratic won the match and they could success to restore own power by own self. Normally there was a three time revolution in Nepal 1950, 1990 and 2005/6. When people could success the revolution of 1950 since that time mostly time was in difficulties and anarchy. King also ruled one party system in 1961 then after all the leader of political parties was in prison. Since 1961 the war was between people and king, there was many demonstration and activities by king and political parties at last king decided to restore the power of people to them at 1990.

After 1990's revolution political parties in government, the king was constitutional. People hope that political parties in government so they will address the problem of common people but unfortunately none of political parties do for Nepalese people. Poverty was growing more than past, violence and demonstration was growing up rapidly. There is one proverb where is poverty there is everything so as same as in Nepal it had many problem and violence. By the cause of this disturbance Maoists also born and they are grow up their activities.

Once time king also absorbed the power of people with himself to take benefit of the disturbance and activities of unpopular political party's activities. In earliest time people was also with king, they were so irritated by the political parties but king was over ruled to Nepalese people. Maoists were also in the battle, the king could not address the problem of the common people and Maoists and he was going on-popular, he was the most un-popular king in the Nepalese history. People want to go with the change of the world but king do not recognize their feelings, ended people decided to do revolution with king, poverty and violence. All the political parties also could success unity and they had agreement with Maoists. By the help of this unity and agreements with Maoists people could success to restore power from king once one more time million of people was in street, there was big participant by Maoists also.

In 2006 after revolution Maoist also decided to leave war with the government and joined in the government. Two years tough exercise the Constitutional Assembly election was held in 2008. The result of the CA election was unbelievable and also unexpected. Maoists won most of the seats in the election. It shows that all the people are irritating by political parties and they fever the Maoists. Nepal is naturally beautiful country. It has many natural resources it is the second largest water resources and the land of highest pick in the world. It has many green mountains which are famous for the walking; climbing. It has also many adventurous spot, where people can enjoy separately in their requirements. The most of the people of Nepal are depending in agriculture, now a day some of the people are depending in foreign employment they are worker of many gulf countries, United States and European unions.

It is also true that the main source of collect foreign exchange in tourism. It was the data that if the government will take good rules and regulation the 70 percent of Nepalese people can get a job, they can promote own country no need to migrate second country.

We are hoping that there will be also revolution in tourism sector the main parties of the Nepal also told us that they will be promote tourism in many ways. So we hope that it will be many travelers in coming days in Nepal. The traveler is always safe, they were safe in past, they are safe in present and they will safe in future. We want to encourage to all of travelers please visit the gift of the 'God'. You must welcome in any time.
