
To the people of Thailand

Posted by thunderbolts - 2007/11/10 16:17

My dear Thai friends,

I will come short to the point. First I like to thank you for accepting and looking after some of my people. These people are also helping you. You have lost nothing but gains by helping them. I do not want to use the workds " exploitation " many of the people have been working in your sweat shops.

Through these people you are getting timber and jeams and cattles, fish and other things cheap from Myanmar,illegally In return your helps included arms and ammunations to the insurgents and terrorists who are fighting to protect their lucrative trade with you. You know that some people from your Thai army are involve in drug traffikking as well,accomplice to Ywet Sit and SURA.

You are given sanctuaries to these Myanamr insurgents as refugees and as displaced people. United Nations give you money for looking after them and you are happy about it.

Myanmars are not happy about you. You have been exploiting Myanmar as a country. Myanmars as people. Even hill tribe Padaung people have become show piece in your hands.

Myanmar are busy fighting among themselves . Thanks to you. You have been helping the Myanmar insurgents to prolong the miseries for Myanmars.

You have the taste of the Musl;ims rebels in the South of your country. What would you say if the Myanmar are helping them? We don't do that. If we have to fight we fightguts to fight ourselves. You know that very well don't you? We Myanmars have fighting spirit, we Myanmars have fighting experirnce for centuries.

Now in Myanmar leaders are preparing to have a dialog talk and to establish peace in Myanmar and you will lose your revenues which you are earning illegally through these insurgents.

In the past Myanmar and Thai have been to war many times for various reasons. Laos, Cambodia , Vietnam were destroyed by the US through you, you are the accomplice. That is how they see you.

Be a good neighbour. To be a good neighbour you need to change a lot. You may be forgiven, but no one will forget what you have done to them.

Thank you, long live the King.

Thunderbolts.

who is the adreseee of you apeal? the people of thailand, slaving their work as much as the legal and illegal burmese workers or the thai government, army and police, who are responsible for the corruption, drugs and armaments dealings.

and who are you to write in the name of the burmese - are you a government official, member of NGO or any democratically elected representative? I do suspect that you simply are writing in your own name, so nothing gives you the right to talk in the name of the burmese or to address thai.

as to burmese insurgents, terrorists and refugess they are the desperate, impoverished and terrorised people trying to find a way out of the misery and oppression - the religious sanctuaries in burma and in thailand do give them protection, as to any oppressed and dispossessed.

In my opinion you don't have consideration to the social and economic problems of burma and you appeal is motivated by the nationalistic and statist politics - so not much convincing to the thai or any other thinking human. You boast about the fighting spirit of burmese - I hope that one day they will show this spirit and overthrow the government and the whole unjust socio-economic system.

down with governments and kings - long live freedom and democracy

=====
